

TRAFFIC LIGHT CONTROLLER

Control traffic light Using
Arduino Microcontroller

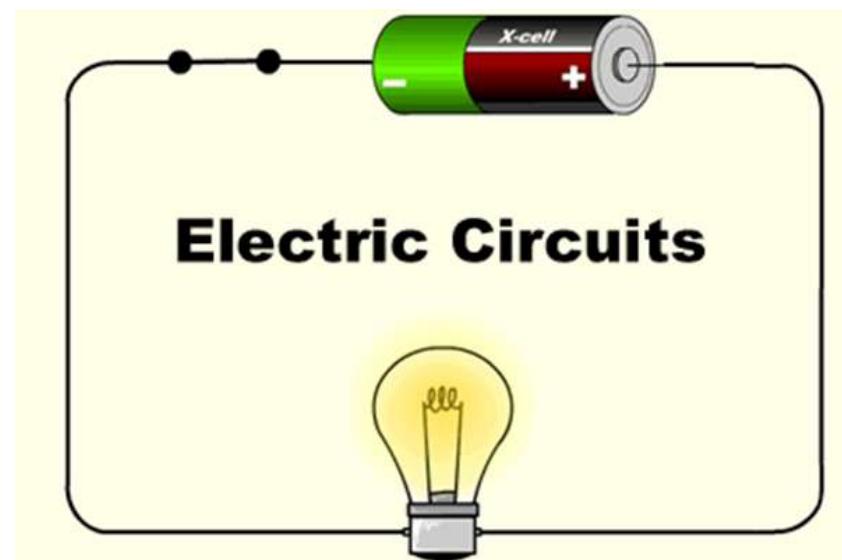

متحكم إشارة المرور

تحكم بإشارة المرور بإستخدام الأردوينو

Circuits and Electricity

الدارة الكهربائية و الكهرباء

Circuit

الدارة الكهربائية

Signals

الإشارات

المخرجات

What is Traffic Light??

ما هي إشارة المرور؟؟

What is consist of??

من مَاذا تتكون؟؟

How lights turn on and off??

كيف يتم إضاءة و إطفاء الأضواء؟؟

Do you think we can control it ??

هل تعتقد انه بامكاننا التحكم بها؟؟

If we can control it, then what is the effect on traffic system??

اذا كان بالامكان التحكم بإشارة المرور، فما هو تأثير ذلك؟؟

What is Microcontroller??

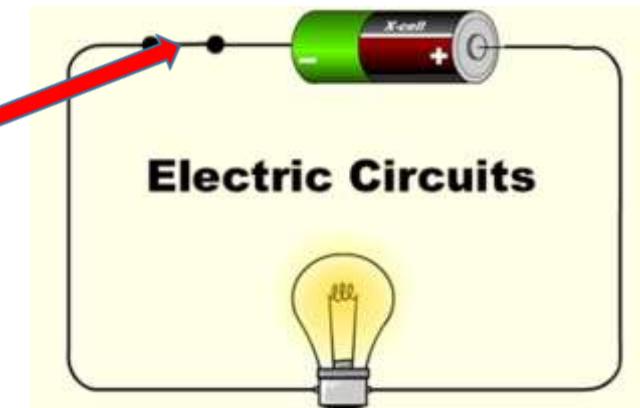

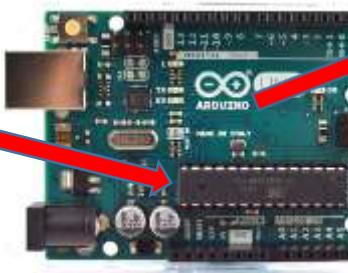

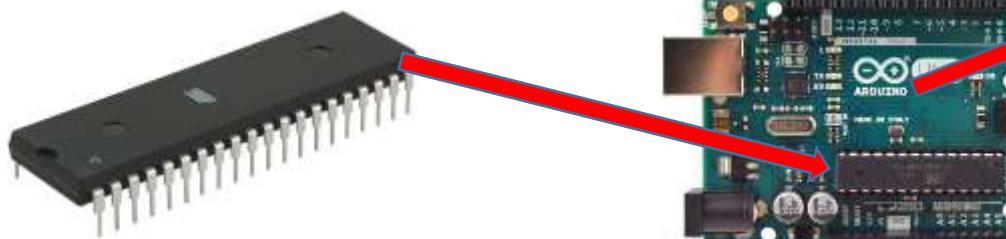

ما هو المتحكم الدقيق؟؟؟

What they do??

ما هو عمله؟؟؟

Where we use them??

أين يمكن استخدام المتحكمات الدقيقة؟؟؟

الأردوينو

ARDUINO

المخارج (الاضواء)

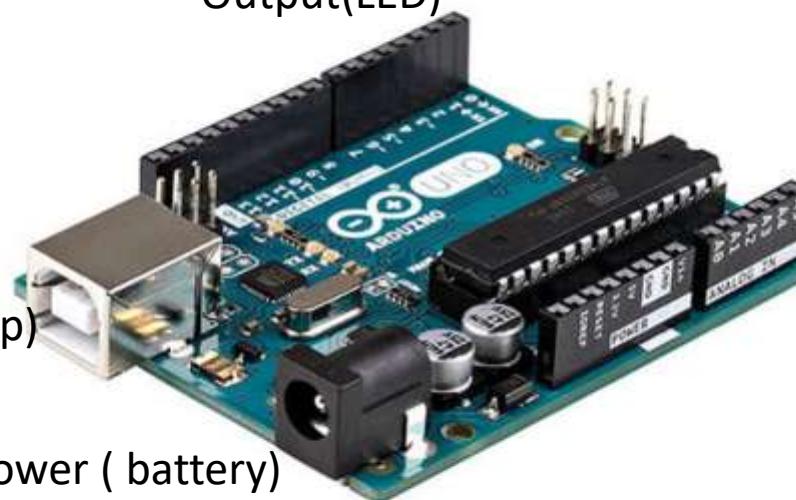

Output(LED)

المدخل (اللaptop)

Input(Laptop)

Power (battery)

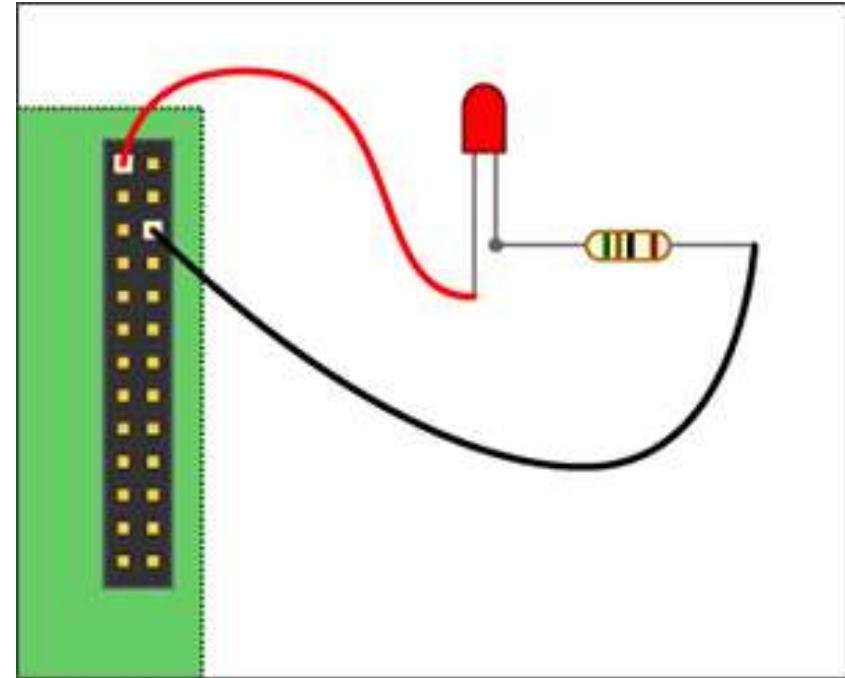

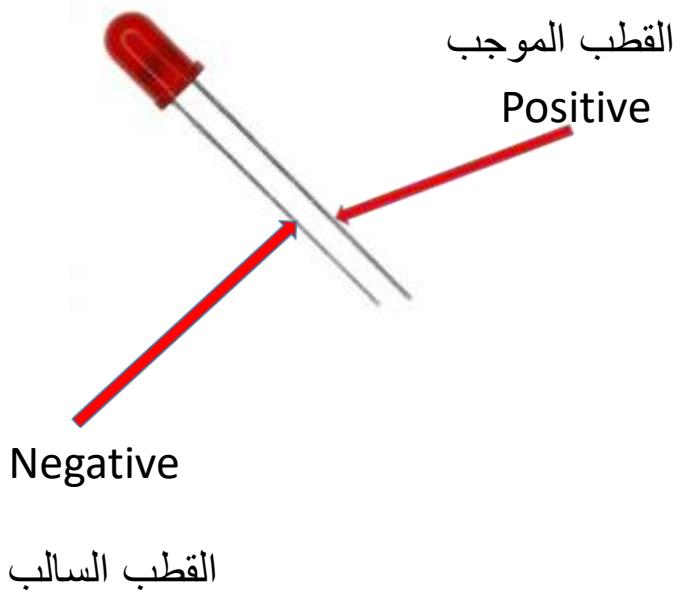

الطاقة (البطارية)

الصمام الضوئي المشع

LEDs

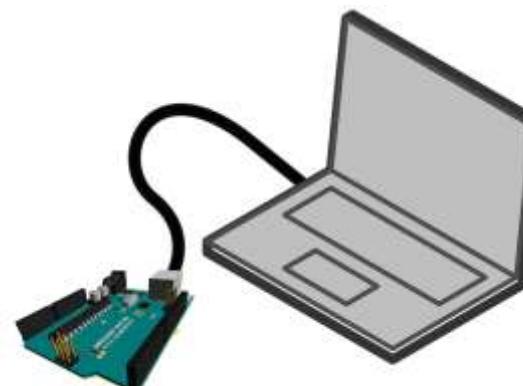

How do we use Microcontroller??

كيف نستخدم المتحكم الدقيق؟؟

THE STORY

Aysha is a 10 years old girl that went to attend a football match in 2022 World Cup,
At the end of the match, Aysha went out with her parents to reach the parking area and they have to cross a road to get there.

There is a traffic light signal and a huge amount of people waiting there to cross the road, but unfortunately the light signals opens only for 30 seconds and closes again for more than 10 minutes,
this is because it's preprogrammed for that.

We need you to find a solution to help Aysha to reach the parking faster without the need to wait for a long time on the traffic signals.

HERE In QATAR We HAVE

TASMU

Qatar Smart Program (**TASMU**) is designed to accelerate the achievement of all the pillars of the **Qatar** National Vision 2030. This program will serve as a platform for the realization of a digital economy and a smart future.

LET'S CONTROL TRAFFIC

هيا تتحكم بإشارة المرور

THANKS
