# Initial Ring Part 2
## Setting the Initials

1. **Login to Tinkercad and click your initial ring design.**

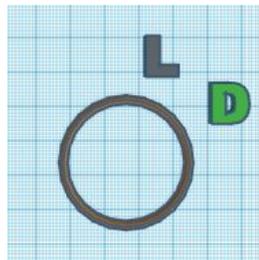

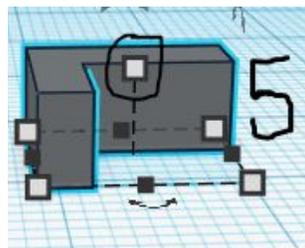

www.tinkercad.com

2. **Get the TEXT AND NUMBERS in the display box.** *Click on the arrow next to Basic Shapes. Then click on Text and Numbers.*

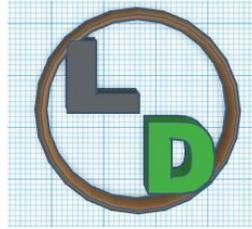

3. **Pull the first letter of your first name onto the workplane.**
4. **Pull the first letter of your last name onto the workplane.** *If you have multiple last names you can choose to use one or both first letters.*

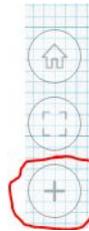

5. **Change the height of each letter to 5mm.** *Click on the letter, then click on the white height square. In the number box type 5.*

6. **Size the letters so they both fit into the ring together.** *They may overlap with each other, they may not. You can place the letters however you want- one on top and one on the bottom, both letters next to each other, or on a diagonal.*

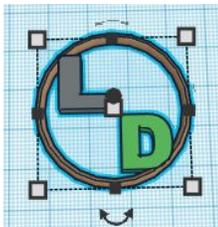

7. **Make sure that each letter is overlapping part of the ring.** *To check this Zoom in by pressing the plus button.*

8. **To move your letters: Click on the letter then use the arrow keys on your keyboard to move your letter to make sure it is touching the ring.** *You should see part of your letters cut off. When finished, zoom out by clicking the minus sign.*

9. **Group your work.** *Click on the workplane and drag a box around the ring and your letters. Click the grouping button. Your design should turn all one color.*

Excellent job!

If you are in the classroom have your work checked by a classmate or your teacher. If you are learning from home your teacher will check your work.
