What is STUDIO 5/6?

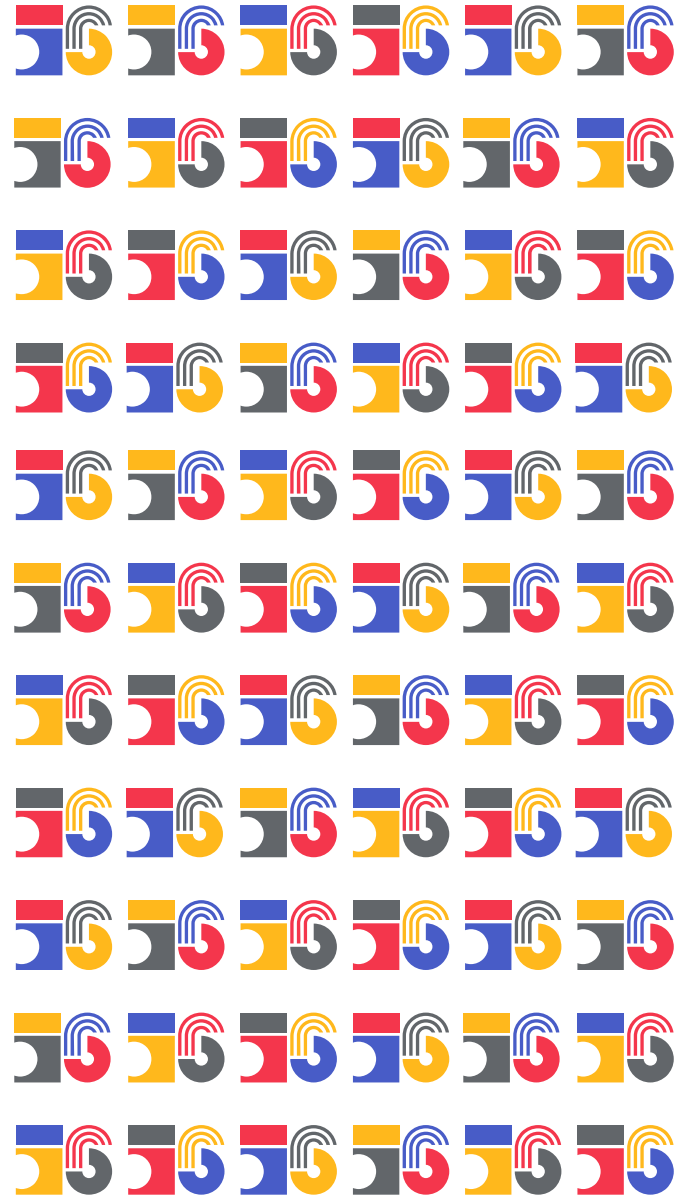

In line with the Ministry of Transport and Communications' Digital Youth Strategy, STUDIO 5/6 is mainly aimed at nurturing youth as digital learners by sharpening their 21st century learning skills, as they develop in an all-pervasive digital environment. In fact, STUDIO 5/6 is envisaged as a community platform that offers technology and allied equipment support for hands-on learning opportunities. Here youth can develop their problem-solving, critical thinking, creativity and innovation skills. This will also develop young people's knowledge of technology and help them to become future creators of technology.
