Criteria	Target (3)	Moving Toward (2)	Needs Support (1)
The Story (2-Minute Narrative)	My story is 2 minutes maximum. It has a clear beginning, middle, and end, and my audience understands the moral/theme.	My story is too short or too long. It has the parts of a story, but the moral is hard to find.	My story is disorganized or missing a clear beginning, middle, or end.
The Plan (Schematic Drawing)	I drew a neat diagram showing the full path of electricity. I correctly labeled the polarity (+ and -) of my components.	I drew a diagram, but I forgot to label the polarity or the path is a bit confusing.	I started building without a finished or labeled diagram.
The Build (Functional Circuit)	My circuit is a functional closed circuit built into my 3D/2D project. It works reliably when I need it to.	My circuit works, but it is "glitchy" or it isn't fully integrated into the 3D/2D art.	My circuit does not light up or is not attached to my story artifact.
The "Spark" (Key Moment)	My LED lights up at the Key Narrative Moment to perfectly match the mood or message of my story.	My LED turns on during the story, but the timing doesn't quite match the "big moment."	I used an LED, but it doesn't seem to have a purpose in the story.
